

MIRACURL

Salon Management System

Complete Application Reference
All Screens · Sections · Project Structure

1. System Overview

Miracurl is a multi-tenant SaaS Salon Management platform. Each salon (tenant) gets its own isolated data, staff, billing and booking pages, managed under one Super Admin console. The platform runs as a PWA (installable on phone) with separate experiences for Owners/Admins, Managers, Staff, the Super Admin, and public Guests.

Technology Stack

- Frontend: React 18, Tailwind CSS, shadcn/ui components, PWA (installable)
- Backend: Python FastAPI, MongoDB (Motor async driver), tenant-scoped data layer
- Auth: JWT via secure HTTPOnly cookies; roles: super_admin, admin (owner), manager, staff
- Payments: Razorpay (LIVE) for tenant subscriptions
- Emails: Resend (verified domain) - welcome, expiry, monthly reports, vendor low-stock
- AI: Emergent LLM key - GPT chatbot, review replies, offer posters (Gemini), Mira TTS voice (OpenAI)
- PDF generation: PyMuPDF - invoices, staff resumes, salary slips
- Thermal printing: Web Bluetooth / Web Serial ESC/POS receipts with Google-review QR code

User Roles

Super Admin	Platform owner. Onboards salons, manages subscriptions, sees cross-salon revenue.
Admin (Owner)	Full salon control: POS, staff, inventory, reports, settings, HR, AI tools.
Manager	Restricted operational role: POS and appointments; no pay/bank/HR data.
Staff	Self-service portal: check-in/out, salary slips, leave requests, resume builder.
Guest (public)	Books online, leaves reviews, uses the salon finder - no login needed.

2. Public Screens (no login)

/book (Salon Finder)

Directory of all active salons. Guests search by city/name and jump to a salon's booking page.

/book/:slug (Online Booking)

Salon-branded booking page: pick services, stylist, date & time slot. Includes the AI Booking Chat Widget for conversational booking. Creates an appointment directly in the salon's calendar.

/review/:token (Guest Review)

One-time review link sent after a visit. Guest rates 1-5 stars per stylist, writes a comment, and may receive a reward coupon code.

/staff-registry (Public Staff Verification)

Cross-salon employment registry. Any salon can verify a candidate's work history, ratings and behaviour notes by staff code - like a beauty-industry background check.

/login

Email + password sign-in for all roles. Includes forgot-password flow and remember-me. New staff with temp passwords are forced to set their own password on first login.

/signup-salon

Self-serve salon registration: salon details, owner account, free trial start.

3. Owner / Admin Screens

Dashboard (/dashboard)

Daily command centre: revenue today, appointments, low-stock alerts, subscription banner. Features Mira's Morning Briefing card - yesterday's revenue, today's appointments, staff on approved leave, low-stock list - plus an optional AI voice greeting (Mira speaks a personalised summary with revenue and week-over-week comparison).

POS - Billing (/pos)

Full point of sale. Catalog tabs: Services, Products, Packages, Memberships with category filters and search. Guest typeahead search with benefits panel: loyalty points (earn & redeem with rules), birthday/anniversary week chips, membership discounts, package session redemption. Cart with per-line stylist attribution, qty, editable discount %. Coupons, GST tax, 4 payment modes (Cash/Card/GPay/PhonePe). Receipt modal: PDF download, WhatsApp share, system print, and one-tap thermal printer printing (Bluetooth/USB, 58/80mm) with a Google-review QR code on every bill.

Appointments (/appointments)

Day list + week grid views. Create bookings with customer, stylist, multiple services, notes. Status flow: scheduled, completed, cancelled, no-show. WhatsApp reminders and post-visit review links sent per appointment.

Customers (/customers)

Guest CRM: contact info, gender, birthday & anniversary (powers POS perks), loyalty points balance, visit history, spend totals. CSV import supported (also by Super Admin per salon).

Services (/services)

Service catalog with categories, prices, durations. CSV bulk import. Feeds POS, online booking and the Offers Studio.

Inventory (/inventory)

Products with stock counts, low-stock thresholds, SKU/brand. Low-stock and out-of-stock alerts on dashboard and in Mira's briefing. Automatic vendor reorder emails when stock runs low.

Staff - HR Hub (/staff)

Staff profiles: photo, role, specialties, shift times, salary structure (base + commission %), bank details for payroll. Requested Staff Leave panel: approve/reject leave with notes (leave valid only after approval). Manager account creation with temp credentials. Salary slips PDF per month.

Staff Registry (/registry)

The salon's own employee registry: register employees with Aadhaar (stored masked & encrypted), employment records (designation, dates, rating, behaviour comments), transfer detection when hiring from another salon.

Attendance (/attendance)

Live roster for any date: on shift / completed / not checked in / on leave (approved leave shows automatically). Geo-fenced staff check-in (200m radius per branch). Summary tiles and per-staff timing details.

Reports (/reports)

Business analytics: revenue trends, top services, staff performance (revenue/bills/services per stylist for today/week/month/last month), commission summaries, branch collections. Monthly business report email automation.

Reviews (/reviews)

All guest reviews with per-stylist ratings. One-click AI reply generator drafts a warm, personalised response to each review. Moderation: show/hide on the public page.

Offers Studio (/offers-studio)

AI marketing studio: generates festival/seasonal offer posters (Gemini image gen) mapped to real services with automatic discount coupons.

AI Assistant (/assistant)

Business chatbot with salon context - ask about revenue, guests, inventory; multi-turn conversations.

Gallery (/gallery)

Photo gallery management for the salon's public booking page.

Messages (/messages)

Direct messaging channel with Miracurl HQ (Super Admin inbox).

Refer & Earn (/refer)

Referral program - invite other salon owners, track rewards.

Plans & Billing (/plans)

Subscription plans, Razorpay checkout, renewal status, payment history.

Settings (/settings)

Salon profile (name, location, phone, GST, Google review URL, gallery), branches with geo coordinates, tax settings, loyalty rules (earn rate, min bill to redeem, per-visit cap), voice greeting toggle, profile completeness meter.

4. Staff Screens

Staff Portal (/staff-portal)

The staff member's home: geo-verified check-in/check-out with live shift timer, month attendance summary, salary preview and slip download, commission earned, Request Planned Leave card (leaves over 5 days need 1 month notice; status Pending/Approved/Rejected with admin note; cancel while pending).

Bank Details (/bank-details)

Staff submit their own bank account, IFSC and PAN for payroll - visible to owner only.

Resume Builder (/build-resume)

One-click professional PDF resume generated from their registry history, skills and ratings.

5. Super Admin Console (/super-admin)

Platform HQ for the Miracurl owner:

- Tenant management: onboard new salons (with AI onboarding poster generation), suspend / re-activate / re-onboard cancelled salons, delete, import customers per salon
- Temp credential sharing modal (WhatsApp-ready message) for new salon owners
- Subscription oversight: trial/subscription expiry alerts (notification bell), renewal nudges, billing panel with Razorpay payment records
- Cross-salon revenue dashboard, leaderboard of top salons, AI insights panel
- HQ Inbox: messages from salon owners with unread badges
- Health badges per tenant and an Engineer panel for diagnostics

6. Background Automations & Notifications

- Welcome email with credentials when a salon is onboarded (Resend, verified domain)
- Subscription/trial expiry warning emails
- Monthly business report email to each owner (auto-scheduler)
- Low-stock vendor reorder emails
- WhatsApp deep links: appointment reminders, bill receipts, review requests, credentials
- Mira voice greeting (TTS) once per user per day - cached to control AI cost
- Review reward coupons after guest feedback
